

Intelligent ERP Solution – S/4 HANA

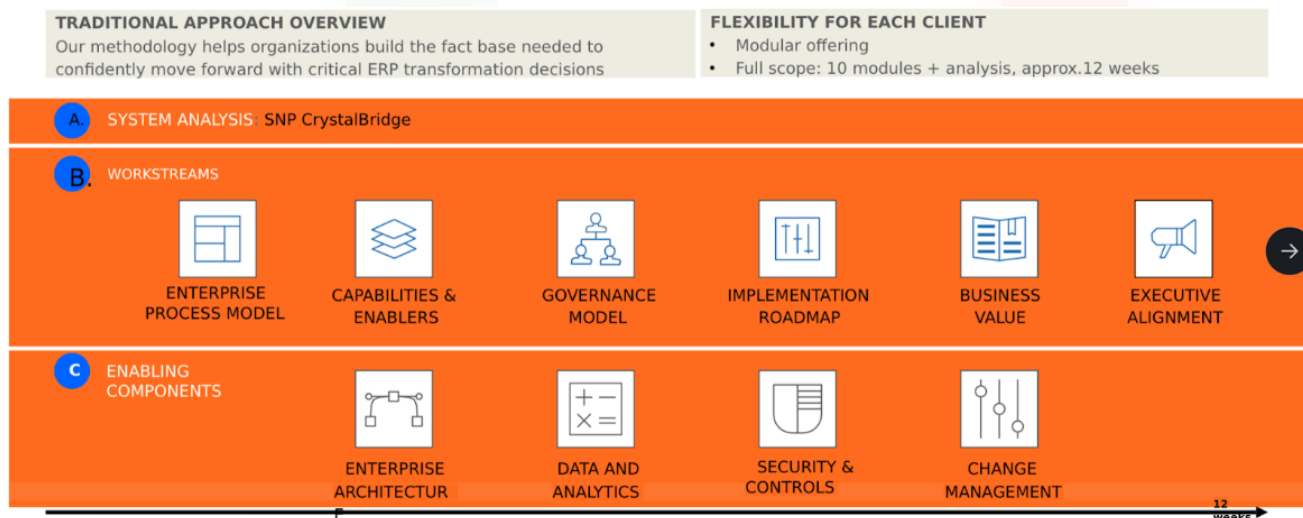

Objective

Complete Digital Transformation, renewing CX strategy with the Hybris Suit (C4C, Marketing & Commerce), implementing a new supply chain and distribution process using Transportation Management, and new analytics using SAC. And in the center of all the transformation, the adoption of SAP S/4 HANA.

Result

- > Minimal disruption to business operations thanks to the Hexad SAP Cloud Solutions Team.
- > 10 Months adoption project, starting on mid September 2019 and went live 20th of July 2020.
- > 22Tb DB Size with 20 Years of historical data migrated.
- > 54hs of cutover window starting Friday/Saturday midnight, delivering S/4 HANA on Monday morning.
- > 5.8Tb was the resulting HANA 2.0 DB size.

Our Modular Approach

Challenges

Moving SAP ECC with 3000+ Custom code objects, a DB size of 22TB, and 20 years of SAP operations to SAP S/4HANA 1809. The outage window permitted was a weekend + a holiday Monday.

Solution Highlights

Report for each module & Executive alignment workshop (4-6 hours) on C-level.
